EXPERIENCE

General Assembly – Software Engineering Immersive

January 2020 - April 2020

Successfully completed intensive 500+ hour program over 12 weeks diving into a large variety of languages relevant to full-stack applications

Fantasy Foragers

<https://kurotsubasa.github.io/fantasy-foragers-client/#/>

Planned and developed a text based, real-time, multiplayer role playing game using React.js as a front end framework, express via the backend server, and socket.io to implement the multiplayer. Fantasy Foragers lends the user the ability to create their own characters and skills, or use other users' characters and skills in order to fight with another character of their choosing.

inStock Co.

<https://sei-nope.github.io/inStock-client/>

Developed an inventory management application that is clean and concise within a small team of four people using mongoDB/mongoose for the backend and JavaScript for the frontend via scrum/agile method.

World of Wishes

<https://kurotsubasa.github.io/writings-client/>

Created application that allows users to keep track of any and all literature that they have read through the use of a custom api developed through ruby on rails

TicTacToe

<https://kurotsubasa.github.io/tictactoe-client/>

Created and deployed a front end application which showcased the classic game of tic tac toe through the use of a custom game engine based off of a mathematical algorithm while constantly updating the game through communication with a pre-built api

Chef -various

2017-2019

Oversaw food preparation and production to ensure food safety procedures were adhered to and managed employee schedules
